

Smart Site Safety System (SSSS)

by AutoSafe Limited

About us

The construction industry is infamous for its high fatality rate. To AutoSafe, safety is of paramount importance.

AutoSafe was founded by an experienced team of researchers and engineers with a mission to improve construction safety via site monitoring automation, leveraging our cutting-edge AI technologies.

We are committed to standing at the forefront of ConTech safety innovation by prioritising Research & Development.

Why choose us?

Extensive Implementation Experience

We are experienced in addressing the unique needs, priorities and regulations, of both - private and public construction sites.

AI Training Expertise

Our team of experts can tailor an AI model to your business needs, optimizing features and data points for your specific use case.

Competitive Pricing

We assess project requirements individually and offer standardised or custom packages. Please contact us to learn more.

Why employing SSSS at your site?

Essential for the success of any construction project

Enhanced Safety

Real-time detection of safety hazards and instant alerts enable prompt corrective action.

Compliance with Government Regulations

The Hong Kong government mandates SSSS on public works projects under HK\$30 million."

Improved Communication

The management platform (CMP) centralizes site data for improved alignment and shared objectives.
